SUMMARY

Computer Science and Engineering student at KMIT with strong foundations in Data Structures & Algorithms, Operating Systems, DBMS, OOP, and Machine Learning. Passionate about software engineering, problem solving, and scalable systems.

EDUCATION

B.Tech in Computer Science and Engineering, KMIT
Expected Graduation: 2028
CGPA: 9.125

ACHIEVEMENTS

- Qualified JEE Advanced 2024
- Qualified JEE Main 2024
- TS EAMCET 2024 – Rank 6171
- Solved 150+ Data Structures and Algorithms problems on LeetCode

PROJECTS

TaskFusion – AI-Powered Asynchronous Processing Platform

- Built a distributed task processing platform using Node.js, RabbitMQ, MongoDB, and Celery.
- Implemented JWT-based authentication and asynchronous task execution.
- Designed background worker architecture to process long-running AI tasks efficiently.

Sonogram-Based Lactation Stage Classification in Dairy Cows

- Developed a deep learning based web platform for sonogram image classification.
- Applied CNN models for lactation stage prediction using ultrasound images.
- Worked with TensorFlow, Keras, NumPy, and Pandas for data processing and model development.

RELEVANT COURSEWORK

Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Machine Learning

TECHNICAL SKILLS

Languages: C, C++, Python, Java

Core CS: DSA, OOP, DBMS, Operating Systems, Multithreading

ML/Data Science: Machine Learning, EDA, ANN, TensorFlow, Keras, NumPy, Pandas, Matplotlib

Tools: Git, Linux, VS Code
